

Figure 1 is a scatter plot showing the E-W Direction [AU] versus the Sun-Earth Direction [AU]. The plot displays various objects, including comets (labeled with IDs like 3C459, 3C456, etc.) and asteroids (labeled with IDs like 2014+358, 2018+022, etc.). The Sun is at the origin (0,0), and Earth is at (1,0). The plot shows the distribution of objects in the E-W plane, with a dashed circle representing the 1 AU distance from the Sun.
