

[illegible]

Figure 1 is a scatter plot showing the N-S Direction [AU] versus the Sun-Earth Direction [AU]. The Sun is at the origin (0,0). The Earth is at (1.0, 0.0). The plot shows the distribution of objects in the N-S direction relative to the Sun-Earth direction. Objects are color-coded: red for objects with a high N-S direction, green for objects with a low N-S direction, and yellow for objects with a moderate N-S direction. The plot also includes dashed concentric circles representing distances from the Sun.
