

Figure 1 is a scatter plot showing the N-S Direction [AU] versus the Sun-Earth Direction [AU]. The plot displays various astronomical objects, including stars and galaxies, plotted as circles of different sizes and colors (red, green, yellow, grey). The Sun is at the origin (0,0). The Earth is at (1,0). The plot shows a distribution of objects, with a concentration of red objects near the Sun and a concentration of green and yellow objects further away. The plot is bounded by a solid black arc representing the Sun-Earth line and a dashed black arc representing the N-S direction.
