

Figure 1 is a scatter plot showing the E-W Direction [AU] versus the Sun-Earth Direction [AU] for various interstellar objects. The plot includes concentric dashed circles representing distances from the Sun (0.25, 0.5, 0.75, 1.0 AU) and a solid arc representing the Earth's orbit (1.0 AU). Objects are color-coded: red for those with a perihelion distance $q < 0.5$ AU, yellow for $0.5 < q < 1.0$ AU, and green for $q > 1.0$ AU. Many objects are labeled with their names and discovery dates in parentheses.
