

[illegible]

Figure 1 is a scatter plot showing the distribution of 100 objects in the N-S Direction [AU] versus the Sun-Earth Direction [AU]. The Sun is at the origin (0,0), and Earth is at (1,0). The plot includes concentric dashed circles representing distances from the Sun and a solid black arc representing the Earth's orbit. Objects are categorized by color (red, yellow, green, and grey) and size, and are labeled with their IDs and coordinates. The plot shows a clear trend where objects are more concentrated towards the Sun and Earth, with a higher density of objects in the inner regions.
