

[illegible][illegible]

Figure 1 is a scatter plot showing the N-S Direction [AU] versus the Sun-Earth Direction [AU]. The plot displays various objects, including comets (open circles) and asteroids (filled circles). The Sun is at the origin (0,0) and Earth is at (1,0). The plot is bounded by a large arc representing the Sun-Earth distance. Objects are labeled with their names and coordinates. The plot shows a distribution of objects along the Sun-Earth line, with some objects clustered near Earth and others further away.
