

[illegible]

Figure 1 is a scatter plot showing the E-W Direction [AU] versus the Sun-Earth Direction [AU]. The plot displays various objects, including comets (labeled with IDs like 1436-16, 1453-10, 1508-05, etc.) and asteroids (labeled with IDs like 1428-03, 1436-16, 1453-10, etc.). The Sun is at the origin (0,0) and Earth is at (1,0). The plot shows a distribution of objects, with a concentration of comets in the upper half (positive E-W Direction) and asteroids in the lower half (negative E-W Direction).
