

[illegible]

Figure 1 is a scatter plot showing the E-W Direction [AU] versus the Sun-Earth Direction [AU]. The plot displays various objects, including the Sun and Earth, with their positions relative to the Sun and Earth. The Sun is at the origin (0,0) and Earth is at (1,0). The plot includes concentric dashed circles representing distances from the Sun and Earth. Objects are labeled with their names and coordinates. The plot shows that the Sun and Earth are in the same direction from the perspective of the objects, with the Sun being closer to the objects than the Earth is.
