

[illegible]

The figure is a scatter plot titled "N-S Direction [AU]" vs "Sun-Earth Direction [AU]". The y-axis ranges from -1.00 to 1.00 with major ticks every 0.25 units. The x-axis ranges from 0.0 to 1.0 with major ticks every 0.2 units. A vertical line at x=0.0 is labeled "Sun" at the bottom and "N" at the top. A horizontal line at y=0.0 is labeled "Earth" at the right end. Concentric dashed circles centered at (1.0, 0.0) represent distances from Earth at 0.25 AU intervals. Solid arcs centered at (0.0, 0.0) represent distances from the Sun at 0.25 AU intervals. Numerous data points are plotted as small circles, many with labels indicating their name and coordinates. Some points are highlighted in red or yellow.
